interior design solutions

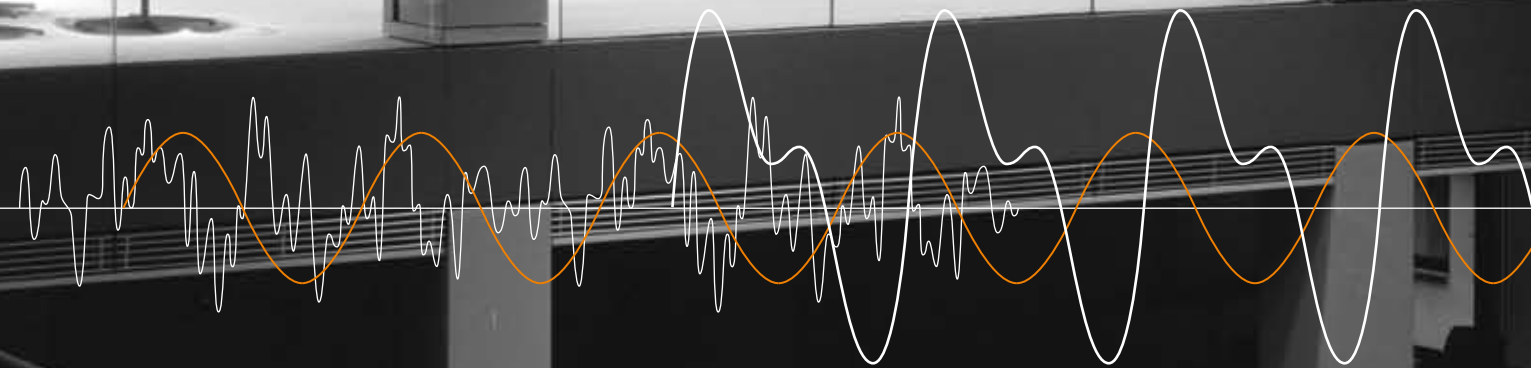

procedes i-d interior design solutions

procedes i-d develops trend-setting concepts and solutions, which give you new opportunities for high-class interior design: With the mooia interior collection, you can use your very own designs to create images that are unmistakeably yours. The **mooia acoustic** product range combines these merits and the ultimate in sound-absorption – for instance, when it is all-important to achieve optimum acoustic conditions coupled with individual interior aesthetics.

room acoustics are fundamental to a pleasant ambience

As with temperature and light, acoustics are a factor in whether or not the room ambience is considered agreeable. Wherever people spend any length of time, the acoustics determine performance, creativity and wellbeing. Which is good reason to opt for professional sound absorption – with **mooia acoustic**.

ringing | clattering | hum of voices | footsteps | outside noise ...

there are plenty of solutions for enhancing acoustics

Do sound protection and aesthetics have to be mutually exclusive? The engineers at **procedes i-d** looked into this question when they analysed conventional sound protection systems and decided to find a more effective solution. Their aim was to develop a versatile solution which would adequately reduce the sound level as required without having to compromise on individual design:
mooia acoustic

but few are truly impressive

With **mooia acoustic**, the sound-absorbing core is completely hidden beneath a textile covering, which you yourself can design. Every **mooia acoustic** element fits into the design like a luxury piece of furniture. All products are DIN EN ISO 354-tested. **mooia acoustic**: The perfect combination of outstanding aesthetics and ideal sound protection.

interior design for excellent acoustics

It is possible for perfect room acoustics to look perfect – in fact they can look exactly how you want. **mooia acoustic** makes it easy for you to deaden sound and reverberation in a targeted manner. All the elements can be combined in any way with one another and printed in a high resolution to your specifications – for exemplary interior design, which meets exactly your standard of aesthetics.

mooia acoustic. Perfect acoustics can be that beautiful.

embrace a new era
of acoustic interior design
with mooia acoustic

customers are pushing,
the atmosphere is hectic,
but your team is composed
thanks to mooia acoustic

A man in a dark suit is seated at a desk in an open-plan office, viewed through a decorative acoustic partition. The partition features a dark blue background with a white, ornate floral and scrollwork pattern. On the desk, a laptop is open, displaying a website, and a stack of papers or a brochure lies next to it. A desk lamp is positioned above the desk. In the background, another person is partially visible, and a sign on the wall reads "mooia" and "Days of Convenience (2001)".

mooia acoustic products

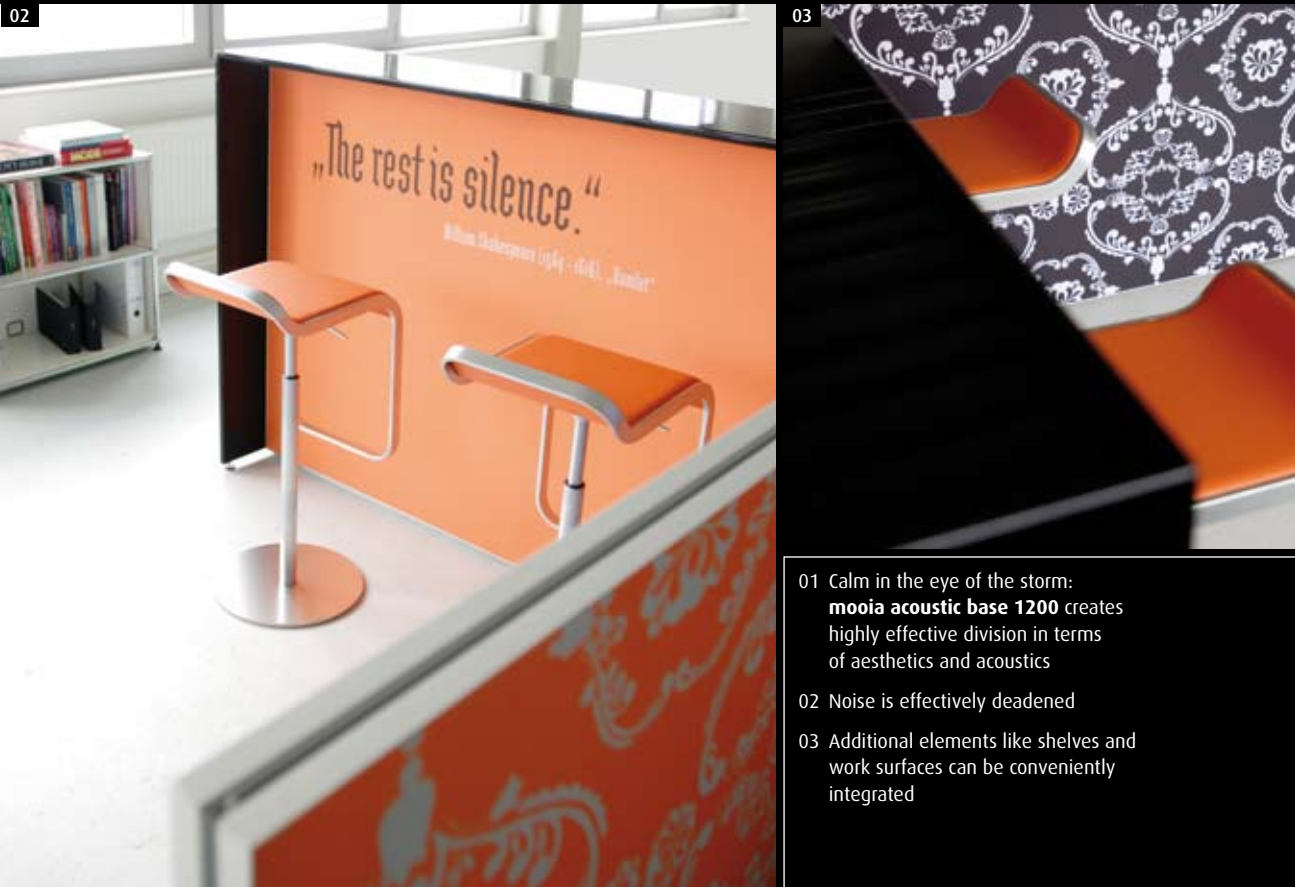

The products from the **mooia acoustic** range are versatile by design to afford the greatest possible degree of creative freedom. The elements can be fixed to the wall or ceiling, as you wish, or free-standing without any floor fixture. Whichever you decide on: **mooia acoustic** products optimise the acoustics in an instant. The specialists at **procedes i-d** will analyse the situation on-site and will manage the planning process if you so wish.

mooia acoustic

mooia acoustic base 1200

mooia acoustic base 1200 is ideal for dividing office space:
The elements, the design of which is in your hands, create work areas with a pleasant, acoustically enhanced ambience, but also facilitate eye contact and the communication of information.

- 01 Calm in the eye of the storm:
mooia acoustic base 1200 creates highly effective division in terms of aesthetics and acoustics
- 02 Noise is effectively deadened
- 03 Additional elements like shelves and work surfaces can be conveniently integrated

mooia acoustic

mooia acoustic base 1600

mooia acoustic base 1600 creates oases of calm within the office bustle. This form of acoustic shielding is recommended especially to enable you to focus on your work or conduct confidential conversations. At 1600 mm in height, **mooia acoustic base 1600** provides very good sound absorption.

<div><div>mooia acoustic base 1600/800</div><div></div><div>Height: 1600 mm Width: 800 mm Function: a/i Textile: i-d trevira cs 300</div></div>	<div><div>mooia acoustic base 1600/1200</div><div></div><div>Height: 1600 mm Width: 1200 mm Function: a/i Textile: i-d trevira cs 300</div></div>	<div><div>mooia acoustic base 1600/1600</div><div></div><div>Height: 1600 mm Width: 1600 mm Function: a/i Textile: i-d trevira cs 300</div></div>	<div><div>mooia acoustic base 1600/2000</div><div></div><div>Height: 1600 mm Width: 2000 mm Function: a/i Textile: i-d trevira cs 300</div><div><div>a = acoustic / sound-absorbing effect i = image / digital high-end printing</div><div>All dimensions exclude the base</div><div>Special dimensions, other textiles and accessories are available on request</div></div></div>

02 All mooia elements can be designed individually, which means that the system can be precisely coordinated with the interior design

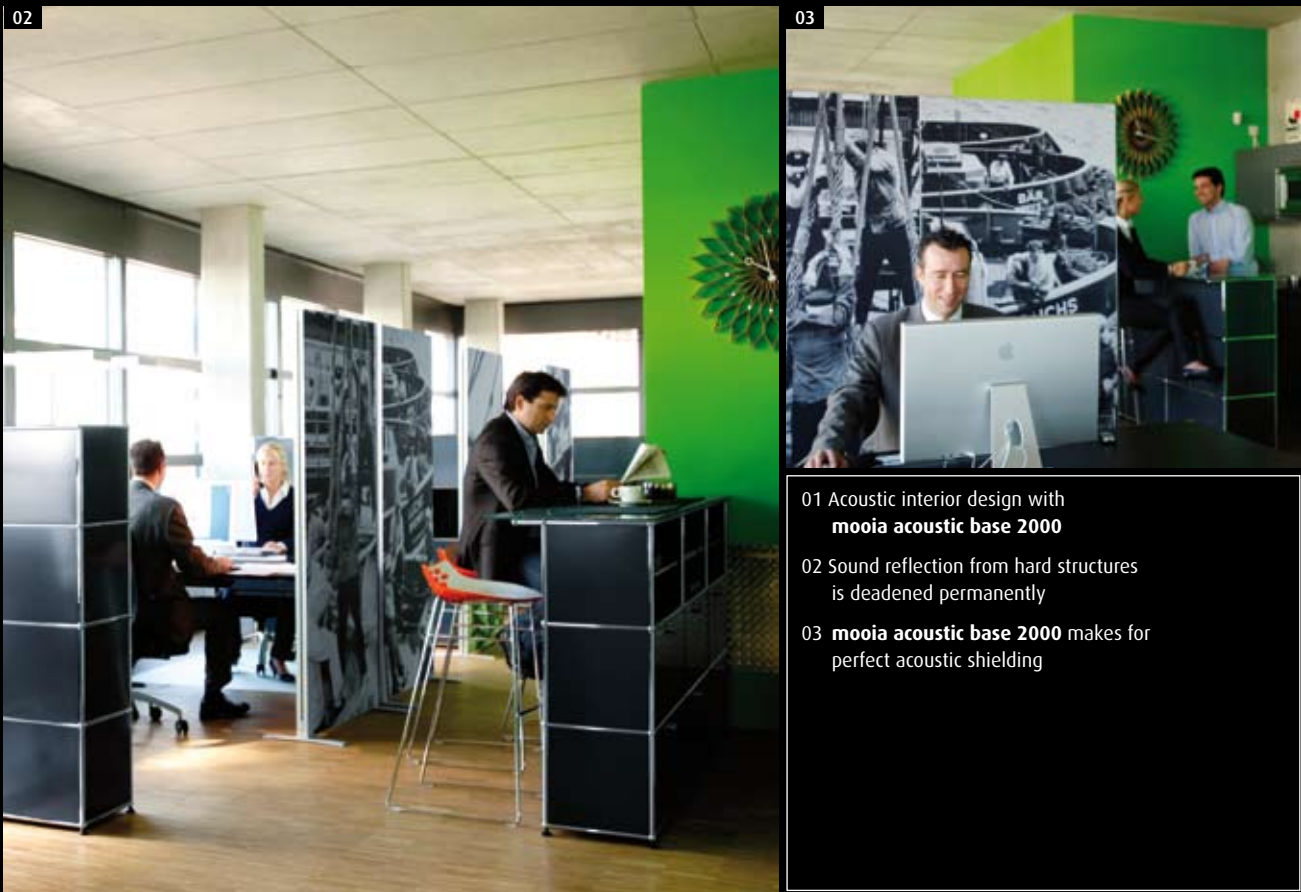

03 Ideal for setting up acoustically separated workplaces

mooia acoustic

mooia acoustic base 2000

mooia acoustic base 2000 turns large spaces into agreeable, tranquil private spheres. On account of the large format, the 2000 mm high elements offer particularly efficient sound absorption and can be systematically extended by the addition of more **mooia acoustic** products.

<div><div>mooia acoustic base 2000/800</div><div></div><div>Height: 2000 mm Width: 800 mm Function: a/i Textile: i-d trevira cs 300</div></div>	<div><div>mooia acoustic base 2000/1200</div><div></div><div>Height: 2000 mm Width: 1200 mm Function: a/i Textile: i-d trevira cs 300</div></div>	<div><div>mooia acoustic base 2000/1600</div><div></div><div>Height: 2000 mm Width: 1600 mm Function: a/i Textile: i-d trevira cs 300</div></div>	<div><div>mooia acoustic base 2000/2000</div><div></div><div>Height: 2000 mm Width: 2000 mm Function: a/i Textile: i-d trevira cs 300</div></div> <div><div>a = acoustic / sound-absorbing effect i = image / digital high-end printing</div><div>All dimensions exclude the base</div><div>Special dimensions, other textiles and accessories are available on request</div></div>

- 01 Acoustic interior design with **mooia acoustic base 2000**
- 02 Sound reflection from hard structures is deadened permanently
- 03 **mooia acoustic base 2000** makes for perfect acoustic shielding

mooia acoustic

mooia acoustic base 2500

mooia acoustic base 2500 was developed for the most demanding needs: The free-standing elements at a height of 2500 mm create insulated room-within-a-room scenarios. On request, open and closed solutions are possible.

<div><div>mooia acoustic base 2500/800</div><div></div><div>Height: 2500 mm Width: 800 mm Function: a/i Textile: i-d trevira cs 300</div></div>	<div><div>mooia acoustic base 2500/1200</div><div></div><div>Height: 2500 mm Width: 1200 mm Function: a/i Textile: i-d trevira cs 300</div></div>	<div><div>mooia acoustic base 2500/1600</div><div></div><div>Height: 2500 mm Width: 1600 mm Function: a/i Textile: i-d trevira cs 300</div></div>	<div><div>mooia acoustic base 2500/2000</div><div></div><div>Height: 2500 mm Width: 2000 mm Function: a/i Textile: i-d trevira cs 300</div></div>

02

 The free-standing elements are versatile as regards position and configuration

03

 Acoustically separated area for confidential conversations

mooia acoustic

mooia acoustic wall

mooia acoustic wall elements are large format murals that enrich spaces and create a better acoustic ambience at the same time. The sound reflection is deadened permanently without the acoustic function of the mural being visible. **mooia acoustic wall** turns your room acoustic into a piece of art that attracts all views. With **mooia acoustic wall** you enjoy extensive freedom of choice regarding formats.

mooia acoustic concept

Sound protection and interior design in one: Discover the revolutionary concept of **mooia acoustic**. Combine the acoustically effective elements at different heights and in different dimensions, with straight or angled connectors and with individual high-end digital printed finishes. Your ideas take shape with **mooia acoustic**.

mooia acoustic

basic components

The **mooia acoustic** product range is the perfect combination of optimum room acoustics and outstanding aesthetics. Every element is made of three basic components: The intelligent frame made of ultra-light aluminium, the textile covering on both sides that you can design yourself, and the sound-absorbing core. The really special thing about the frame is the continuous groove, which allows you to securely mount lights and other accessories.

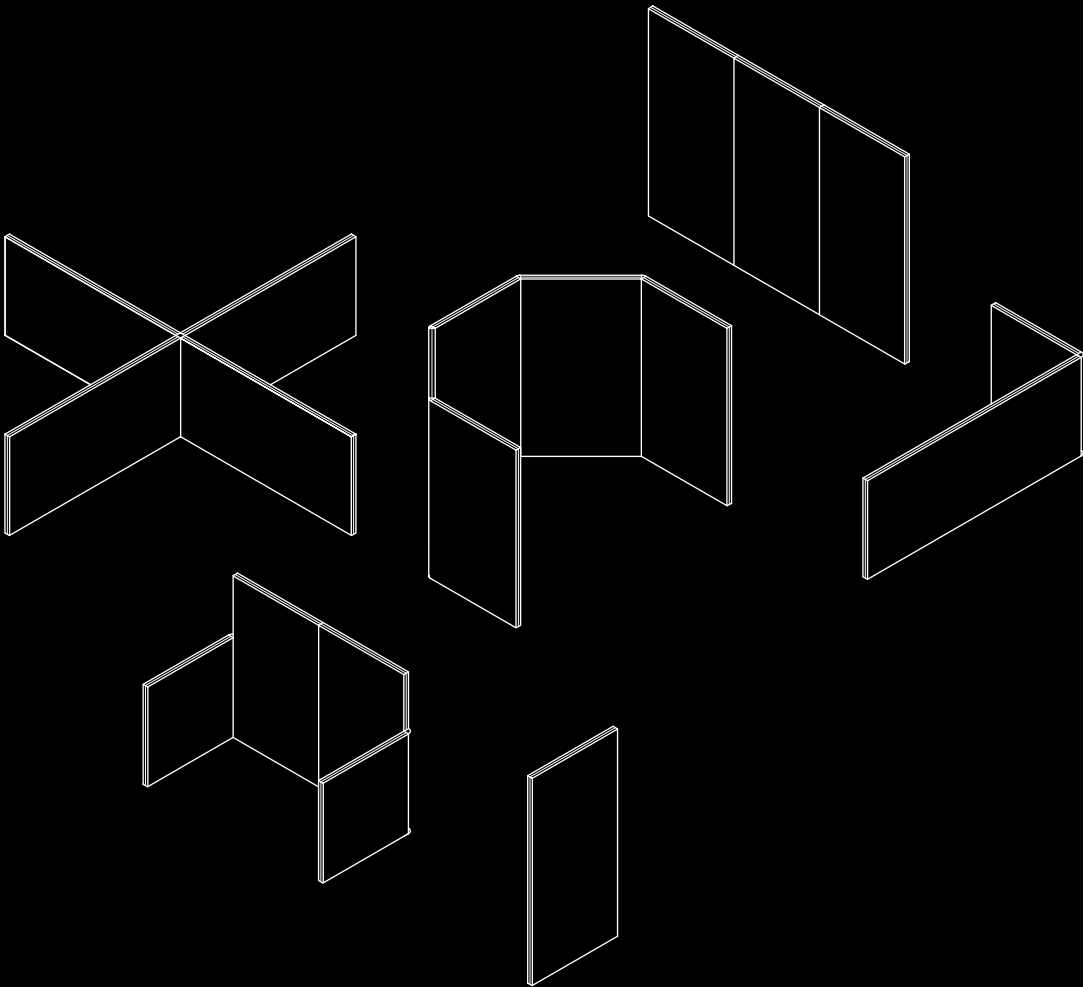

- 01 | intelligent build**
The frame is made of high-grade aluminium
- 02 | individual design**
The textile covering on both sides can be digitally printed with a motif of your choice in brilliant quality
- 03 | perfect acoustics**
The centrepiece of all mooia acoustic products is the sound-absorbing core, made of a specially developed high-tech foam

mooia acoustic connectors

mooia acoustic creates almost unlimited scope for your individual interior design. Connectors can be used to join all elements to divide up rooms both acoustically and visually. Angled, straight, cross- and T-shaped joints create unlimited scope for interior design – with **mooia acoustic base**, **mooia acoustic wall** and **mooia acoustic air**.

		180°-connector Material: Stainless steel Function: 180°-connection of two mooia acoustic base elements
		t-connector Material: Stainless steel Function: T-shaped-connection of two mooia acoustic base elements
		x-connector Material: Stainless steel Function: X-shaped-connection of four mooia acoustic base elements
		135°-connector Material: Stainless steel Function: 135°-connection of two mooia acoustic base elements
		120°-connector Material: Stainless steel Function: 120°-connection of two mooia acoustic base elements
		90°-connector Material: Stainless steel Function: 90°-connection of two mooia acoustic base elements
		90°-connector, angulated Material: Stainless steel Function: 90°-connection of two mooia acoustic base elements of different height

mooia acoustic

creative freedom

mooia acoustic sets no limits to your creativity. The textile covering can be printed to your specifications in a high resolution in keeping with your Corporate Image. Graphic patterns and block colours are also possible – depending on the visual effect you wish to achieve. You have a choice of high-quality textiles with smooth or textured finishes for the fabric on both sides. The possibility of individual design means you can use **mooia acoustic** as a guidance system, image board or an easy to update advertising space.

01

02

03

04

01 The **mooia acoustic** products can be digitally printed with your own images or motifs from the extensive **procedes i-d** image library in high quality

02 Your layouts are rendered in top quality one to one

03 Your graphics, patterns and textures are printed precisely to your specifications

04 For covering both sides of your **mooia acoustic** products, you have a choice of technical textiles, tested for their acoustic effectiveness

mooia acoustic extensions

The **mooia acoustic** product range features excellent extendibility – you can mount accessories such as lights, cable ducts or shelves on the perimeter groove. Even the aluminium bases for setting up free-standing versions in the space are mounted on the groove in the frame.

mooia acoustic commended by the jury of the ait innovation prize

mooia acoustic features ease of handling, outstanding workmanship and exclusive design. At the "Textile and Object 2008" innovation awards, **mooia acoustic** was commended by the jury of the renowned architecture magazine AIT for making a good contribution to sound absorption in large spaces.
